

## Automatic wrapper for rigid box B420

**Price: 17500 EUR**

Automatic wrapper for rigid box B420

The machine is practically new. Installation in 2024.

Application: for wrapping the covering material on a box.

Automated device dedicated to forming solid cardboard boxes by wrapping veneer on a box made of solid cardboard. This is the latest version of the device, with a PLC controller and servomotor, where the external dimensions of the box (length, width, height) are entered on the touch programmer and the machine automatically sets itself to the given size.
