

Foldmaster 200 SA Automatic Folding Machine

Price: 6250 EUR

Foldmaster 200 SA Automatic Folding Machine

This is the latest product from the Swiss company Multigraf AG.

The machine is in good working order and ready for production.

Equipped with new rollers.

Features 2 folding plates that are electronically adjusted via a control panel, allowing for very fast setup and high precision.

Includes a pneumatic feed system and soundproofing.

Comes with accessories, including:

an operating manual and a creasing kit.

Ideal for the pharmaceutical industry due to its small minimum fold size.

Electric delivery system with infinitely variable delivery speed.

Infinitely variable folding speed.

Power supply: 230V.

Becker compressor.

Format: 35 x 55 cm.

The control unit/counter performs the following functions:

- setting a specific batch size;
- setting the duration of the pause between individual batches of sheets;
- displaying the total quantity of processed material;
- displaying the operating speed (units per hour);
- programming the suction duration;
- programming the pulse duration for the spacing between sheets.

Paper weight range: 40-240 g/m².

Throughput (A4 format): up to 30,000 sheets per hour.
