

Horizon BQ-270V perfect binder

Price: 22380 EUR

Horizon BQ-270V perfect binder
Machine in very good condition.
Ready for work.

Manufacturer's description:

Professional binder for perfect soft binding. Fully automatic gluer with an exceptionally stable structure, equipped with a hot glue gluer, effective also for small and very small quantities of sheets or sheets. The Horizon BQ-270V binder is a single-jaw machine with automatic cover feeding that, operated by one person, delivers impeccably bound books of consistently high quality. Standardly equipped with a scanner for measuring the insert thickness, it allows you to glue books using „on demand” technology

Binds books with a thickness of 0.5 to 50 mm and spine lengths from 135 to 320 mm with a maximum number of copies up to 500 books/hour.

Factory-built cutter with additional cutting knives.

Maximum milling depth up to 3 mm.

Automatic cover feeding using a suction drum with a certain, constant position in relation to the bound sheets.

Factory-built installation creating 4-fold creases on the cover, which adjusts automatically for an exact fit. As an option, installing 6 creases for gluing books with bookmarks
