

## Ideal 7260 hydraulic paper guillotine

**Price: under request EUR**

Ideal 7260 hydraulic paper guillotine

The machine is in very good condition, year of production 2018.

Professional cutter designed for high-efficiency cutting. The proposed model has a very good value for money. Guillotine with a knife length of 721 mm. is equipped with infrared safety curtains, hydraulic pressure, electromechanical drive of the knife beam, air table, enlarged side tables.

The standard equipment also includes a work programmer with 99-step work programs, electronic reading of the saddle position with an accuracy of 1/10 mm and a self-diagnosis system with error information shown on the display. The main worktable of the machine is made of stainless steel with a blast. To facilitate work, the paper pushing function is used.

Technical data:

Cutting length 721 mm

Input height 80 mm

Insertion depth 720 mm

Front table depth 530 mm

Minimum final cut 20 mm

Minimum final cut with 90mm beam cover in place

Power supply 400 V / 50Hz 1.5kW

Weight 588 kg

Dimensions 1335 x 1305 x 1540mm

Basic features:

electromechanical knife drive,

hydraulic pressure

completely adjustable pressure force (250-2000 kg)

optical cutting line indicator (laser)

table lighting

air table (at front and rear table)

pedal for initial cutting line marking

front table made of chrome-nickel steel

blade made of high-quality HSS steel

Security is ensured by:

safety curtains - photocells

safety cover on the back table

safe drive - IDEAL patent

two-handed cutting start, electronically controlled

automatic knife return from any position

main switch equipped with a key switch

possibility of replacing the knife with the blade constantly covered
