

Laminating machine Matrix MX 530

Price: 4200 EUR

Laminating machine Matrix MX 530

Machine in very good condition, comes from a small digital printing house.

The set with the machine includes foil and user manual.

Description:

MATRIX is a semi-automatic laminating machine for hot laminating with a built-in sheet separator.

The device is designed for laminating digital or offset prints in low and medium circulation.

It can be operated by one operator at a speed of up to 10 m / min.

Additional advantages are quiet operation and a small area it occupies in the printing house.

Key features of the device:

Semi-automatic mode (the operator feeds the sheets onto the table, the next cycle is automatic)

Multi-level, adjustable „anti-curling” roller system straightening the sheets

Built-in, automatic sheet separator

The device is suitable for both digital and offset printing

Quick format changes and easy replacement of film rolls (3000m rolls)

Device operation cycle:

The programmer allows you to adjust the speed, overlap length and temperature

The operator feeds the sheets manually

The sheets are automatically taken by the rollers according to the set overlap

Ready, separated sheets are delivered to the receiving tray

Maximum film width 500 mm

Maximum paper width 530 mm

Maximum paper length 1200 mm

Minimum paper format 200 x 300 mm

Laminating speed up to 10 meters per minute

Front table dimensions 668 x 542mm

Paper weight 115-350 g/m²

Temperature 80 - 130 °C

Warm-up time 10-15 minutes

Dimensions 84x210x131.5cm

Power consumption 1.5-2kW

Power supply 230V,50Hz

Weight with base 194/260kg
