

Linea DH-360 roll laminator

Price: 790 EUR

Linea DH-360 roll laminator

The device is ready for work.

Fully functional, in very good condition.

Description:

The Linea laminator is a professional roll laminator with a working width of 340 mm. The laminator we offer is an ideal device for a small printing company, advertising agency or office.

This device allows us to laminate various materials thanks to independent control of the heating of the upper and lower rollers. Electronic control of the lamination process and two operating modes, manual and automatic, make working on this machine easy and pleasant, and the laminations are always of the highest quality.

The laminator allows for single- or double-sided lamination.

The equipment includes a roll of foil visible in the photo.

Technical parameters:

- maximum lamination width: 340 mm
- foil thickness: 35-250 micro
- working gap: 0-4 mm
- lamination speed: 1400 mm/min
- setting the pressure force: manual
- temperature setting: digital
- power supply: 230 V
- power: 700W
