

Rapid 106E electric stapler

Price: 400 EUR

Rapid 106E electric stapler

The device is operational and ready to work.

Description:

File thickness: 50 sheets of 80g/m² or 5mm paper

Stapling depth: 100mm or A3 in half

Efficiency: up to 40 cycles per minute

Staple type: Rapid 66/6, 66/6R, 66/8

Rapid 106E stapler for printing applications, for brochures, brochures, notebooks, ideal for working in small printing shops. Thanks to the adjustable table, it can stitch flat and saddle stitch.

The Rapid 106 stapler can work in groups of several pieces at the same time, after using an additional coupling rail, available as an additional accessory. An insert for stitching with eye staples is also available as an option, which significantly expands the scope of use of the stapler.

The set includes a stapler with a table, release pedal and an insert for flat staples. The stapler is powered directly from the 240V network via a 3-wire cable.
