Manufacturer's description:

Automated machine for soft binding. All parameters are measured automatically, eliminating the need for manual data entry

Productivity up to 650 cycles per hour

Hot Melt glue gluing

Control panel with 12-inch touch screen to control all functions

Production of all standard cover sizes and more (100 x 100 mm to 385 x 380 mm)

Cover creasing is precise and automatic thanks to tool-free configuration

13 creasing lines up/down (using a strip) ensure the highest quality by avoiding surface damage and cover cracks. It also allows for the production of covers with so-called „wings“ (the wings are not folded inside the cover automatically)

Integrated double cover feed sensor

Possibility of gluing blocks - with or without a cover

The set includes documentation, waste extraction, documentation, tools and parts.
