

Duplo Docucutter DC-645 Creaser, cutter

Price: 5000 EUR

Duplo Docucutter DC-645 Creaser, cutter

The machine is fully operational, ready for production.

Description:

The DC-645 has been designed for the growing needs of fast execution of such orders as: business cards, invitations, postcards, leaflets, covers, folders. Docucutter DC-645 cuts lengthwise and crosswise as well as creases, perforates in one pass, ensures continuity of production with minimal operator input. All machine settings can be adjusted automatically - from the settings of the cutting knives, creasing beams to the setting of the creasing depth. When cutting out the work, clippings are created, which, thanks to appropriate control, go directly to the basket located in the lower part of the device's housing.

With the DC-645 device, we will perform such works as:

Postcards

Cut and creased business cards

Flyers

Brochures

Book covers

CD/DVD covers

Menu

Mailing materials

Automatic discharge of clippings into the basket

Automatic adjustment of creasing depth
