

Hard cover making table -Casemaker-

Price: 7500 EUR

Hard cover making table -Casemaker-

The device is brand new, with a 12 month warranty.

European production, based on branded subassemblies.

Duty Cycle:

The operator manually handles the covering material, to the gluing device in which the hot glue is automatically applied (operating temperature 60-70 ° C).

A sheet of covering material with glue the operator places it manually on the suction table, then manually handles sheets of cardboard and spine.

The pre-prepared cover is inserted into device manually, which winds up and glues the top and bottom of the covering material (patented brush system).

During the sizing operation, the cover is pressed through the guide rolls.

Covers leaving the unit are immediately ready for further processing

The machine is equipped with:

- gluing device for applying glue onto the top of the sheet
- table with a suction
- guides fixing the veneer and cardboard
- wrapper module
- delivery table

Technical data:

Max format: 840x500mm

Min format: 140x140mm

Performance: 100-150 covers / h

Thickness of the covering material: 80-200 gsm

Thickness of cardboard: 1-4mm

Overlap covering material: 13-20mm

Glue temperature: 30-65 °C

Glue capacity: 2-3kg

Smooth adjustment of the rotation speed of the rollers and brushes

Types of covering material: fabric, laminated paper, photographic paper, imitation leather, PVC, polyurethane.

Dimensions of the machine: 1500x1000x1000mm

Power supply: 380V

Consumption: 3.7kW

Machine weight: 250kg
