

HFS-210 Hot Stamping Press

Price: 4000 EUR

HFS-210 Hot Stamping Press

The machine is in perfect condition. Year of manufacture: 2019.

Description: The HFS-210 Hot Stamping Press is a pneumatic hot stamping press for hot stamping, embossing paper, and plastics. A useful device in any advertising agency or digital printing house. The cycle is operated manually. The pneumatic drive ensures repeatable work and very high die pressure on the material.

The machine is equipped with an automatic foil feed, which significantly shortens the time of a single hot stamping cycle, a worktop, adjustable embossing depth, a hot plate ground to 0.01 mm accuracy, which significantly improves the quality of embossing with large dies, a control panel, and modern OMRON controls.

Specifications:

MODEL: HFS-210 Hot Stamping Press

Heating plate size: 210 x 150 mm

Work table area: 500 x 350 mm

Heating temperature control: via display up to 200°C

Holding foil adjustment: Automatic, potentiometer-controlled

Hot plate pressure mechanism: pneumatic

Height of the gilding stack: 68 mm

Press force: 0.6 T

Power consumption: 900 W

Power supply: 230 V

Machine dimensions: 750 mm (W) x 530 mm (D) x 1670 mm (H)

Machine weight: 120 kg

The machine includes a cross table and a die mounting frame. An instruction manual is included.
