

Hi-Tech F350B Roll Laminator

Price: 1800 EUR

Hi-Tech F350B Roll Laminator

A device in very good condition, ready for production,
This is a high-quality machine.

Description:

The Hi-Tech F350B Roll Laminator is a professional roll laminator with a working width of 350mm. The laminator we offer is an ideal device for a small printing company, advertising agency or office.

This device gives us the ability to laminate a variety of materials thanks to the independent control of the heating of the upper and lower rollers. Electronic control of the lamination process and two modes of operation: manual and automatic make working on this machine easy and pleasant, and the laminations made are always of the highest quality.

The laminator allows for single- or double-sided lamination.

The equipment includes a laminating foil

Technical parameters:

- maximum laminating width: 350 mm
- foil thickness: 25-250 micro
