Description

The FR Series from Hoist are extendable counterweight lift truck. These machines, which are well-suited for riggers and machinery movers, provide a vast range of capacity options with just the push of a button.

The counterweight frame of the FR 35/35 35,000 lbs. capacity lift truck is extendable, designed to provide stability at full capacity and extended load centers. It is compact to allow excellent maneuvering in confined areas. Stackable counterweights and a removable hydraulic boom with collapsible boom stand allow of ease of transport. Furthermore, these machines feature quick-change forks for tons of flexibility.

As with all Hoist Liftruck equipment, the FR Series is 100% made in the USA.
