Manufacturer's description:

Professional binder for perfect softcover. Fully automatic binder with an exceptionally stable type of construction, equipped with a hot glue gluing device, effective also for small and very small quantities of legs or pages. The Horizon BQ-480 binder is a four-jaw machine with automatic cover feeding, which, operated by one person, delivers impeccably bound books in consistently high quality.

Binds books with a thickness of 1 to 65 mm and a spine length of 145 to 320 mm with a maximum number of copies up to 1350 books/hour.

Factory-built cutter with additional scoring knives and cleaning brushes.

Maximum milling depth up to 4 mm.

Automatic cover feeding using a suction drum with a certain, fixed setting relative to the bound sheets.

Factory-built installation creating 4-fold creases on the cover, which is set automatically with precise adjustment.

The set includes documentation, additional elements, waste extraction, transformer.
