

Hot stamping machine HFS-310

Price: 10500 EUR

Hot stamping machine HFS-310
The device is brand new, unused.

Description:

Hot stamping machine HFS-310 is a pneumatic hot-stamping press with a working surface of a 310mm x 210mm heating plate. Perfect for stamping, among others calendars, covers, business cards and gilding on various printed materials. Rigid welded steel construction, pneumatic piston with smooth regulation of clamping force and automation of the control system guarantee high quality and repeatability of performed works. The device has been equipped with an automatic foil puller which significantly shortens the time of a single gilding cycle, worktop, depth of delivery, ground plate with an accuracy of 0.01 mm which significantly increases the quality of pressing large dies, a touch panel and modern OMRON control.

Specification:

The size of the heating plate 310 × 210 mm
Working table surface 460 × 290 mm
Heating temperature regulation from the display to 300 ° C
Adjusting the closing time from the display
Gilding foil adjustment Automatic Adjustment from the display
Heating plate pressure mechanism Automatic, pneumatic
Working gap (piston lift height) 88 mm
Height of a gilded pile of 80 mm
Diameter of the piston 125 mm
Automatic counter
Press force up to 1.8T
Supply air pressure 0.8 - 1.2 MPa
Power consumption 1500 W
230 V power supply
Machine dimensions 1070 mm (W) x 860 (D) x 1720 mm (H)
Machine weight 205 kg
The instruction manual is included in the set.
