

Ideal 7260 Hydraulic Paper Guillotine

Price: 11000 EUR

Ideal 7260 Hydraulic Paper Guillotine
Machine in very good condition, ready for production.

This professional cutter is designed for high-performance cutting. This model offers excellent value for money. The guillotine has a 721 mm knife length and is equipped with infrared safety curtains, a hydraulic hold-down device, and an electromechanical cutter bar drive.

Standard equipment also includes a programmable program with 99 steps each, electronic saddle position reading with 1/10 mm accuracy, and a self-diagnostic system with error messages displayed on the screen. The machine's main work table is made of stainless steel and has a blower. A paper ejection function is included for ease of use.

Technical data:

Cutting length 721 mm

Infeed height 80 mm

Infeed depth 720 mm

Front table depth 530 mm

Minimum final offcut 20 mm

Minimum final offcut with beam guard in place 90 mm

Power supply 400 V / 50 Hz 1.5 kW

Weight 588 kg

Dimensions 1335 x 1305 x 1540 mm

Key features:

Electromechanical knife drive,

Hydraulic clamp,

Fully adjustable cutting force (250-2000 kg),

Optical cutting line indicator (Laser),

Air table (on front and rear tables),

Pedal for pre-marking the cutting line,

Front table made of chrome-nickel steel,

Blade made of high-quality HSS steel,

Safety features ensured by:

safety curtains - photocells

transparent safety cover on the rear table

safe drive - IDEAL patent

two-handed, electronically controlled cutting start

automatic knife return from any position

main switch equipped with a key switch

knife replacement possible with the blade permanently covered
