The device is functional and ready for production, in very good condition.

The photos show the product being sold.

Produced in Italy.

Manufacturer's description:

Mailbag is a digital compact system for packaging in plastic bags, ideal for packaging brochures, newspapers, books. Single-phase power supply (airless) is easy to use with mounted wheels, the system can be easily moved from one place to another with minimal fuss.

A product, e.g. a magazine inserted into the feeder, initiates a photocell, detects the package and moves the film and product to the closing system. The combination of transverse and longitudinal seals closes the package and also creates a seal for the next product.

The finished package gently falls into the receiving basket at the bottom of the machine.

Technical data:

Production speeds, depending on package and film dimensions (up to 1200 pph)

Min. package width 160 mm

Max. package width 250 mm

Min. package length 100 mm

Max. package length 360 mm

Max. film thickness 30 microns

Machine dimensions 600 mm x 840 mm x 1050 mm

Weight 144 kg

Power supply 230V

Power consumption 0.6 kW
