

Nagel Citoborma 290AB Paper Drill

Price: 3750 EUR

Nagel Citoborma 290AB Paper Drill

The machine is 100% functional and ready to use.

Robust construction - weighs 200 kg. This is the current Citoborma drill model in production.

400V power supply.

Two drilling heads with adjustable spacing ranging from 45-170 mm.

Drill diameter: 2-20 mm.

Stack height: 60 mm.

Controlled by an electric foot pedal.

Waste is directed to an external sleeve.

The drill table is adjustable in every direction (sides, front/back) and has stops for setting the drill spacing (non-standard drilling). Additionally, a special module for standard spacings is installed in the table.

Furthermore, the table has two movable margins.

The drill has an automatically released table lock after each cycle, allowing the table to be moved to the next position. The set includes drills, tools and instructions.
