

ZNHZ-508A Envelope Making Machine

Price: 7000 EUR

ZNHZ-508A Envelope Making Machine

Paper weight 70 - 150 g/m²

Production rate 3000 - 9000 pcs/h

Maximum folded envelope size Western Style 324 x 229 mm

Min. folded envelope size 100 x 100 mm

Power 8 kW

Weight 3000 kg

Dimensions 6600 x 1200 x 1300 mm

Year of manufacture 2014.

Key advantages of the machine:

- A bottom-mounted vacuum feeder allows for continuous material loading without stopping the machine.
- A proprietary adjustable creasing and perforation system on the machine cylinder allows for loading material in the form of only the cut-out envelope outline.
- Simple and easy adjustments simplify and shorten makeready time.
- Standard bookbinding glue is applied from an inkwell through rotating rings with precise adjustment of its position and intensity.
- Glue for the closure is also applied from an inkwell with precise adjustment of the intensity.
- A vacuum suction system located on the cylinders allows for perfect folding of envelopes even at very high speeds.
- The machine has two folding systems enabling double-closing of envelopes.
- The electronic counting system is equipped with an electromagnetic separating device, allowing for separating envelopes, e.g., 50 pieces per envelope.
